

This is a must read if you are involved in constructing/or planning to construct Mid-Rise, Multi-residential Buildings

Recently you have received notification of a RESCON sponsored Seminar titled:

High Rise Training Series /Six Storey Wood Buildings.

I want to ensure that our members are well represented because even though this Seminar is initiated and sponsored by RESCON, it is open to others who are filling up the limited space fast.

Not only is the number of participants growing so too is the speakers list which now includes:

- Steven Street, Technical director, Ontario Wood *Works* (facilitator)
- Robert Kok, Panelizer for Brockport)
- Marco Vander Maas (Quadrangle Architects)
- David Moses, P. Eng. (Moses Structural engineers)

with more speakers to come .

We encourage you to enroll your staff in this Seminar [\(details attached\)](#) and to do it now before all of the seats are taken.

This is your chance to ensure your staff has the knowledge to embrace the pending changes in the Ontario Building Code, which will allow the construction of 6 Storey Wood Buildings

Hope to see you there.

Michael Steele, B. Tech. (C.M.)

Director, Technical Standards
